PROFESSIONAL SUMMARY

Results-driven Senior Software Engineer with over 6 years of experience designing and implementing scalable backend systems and distributed architectures. Expert in building RESTful microservices, optimizing complex data pipelines, and mentoring high-performing engineering teams. Passionate about cloud-native technologies and maintaining high standards of code quality through rigorous testing and peer reviews.

PROFESSIONAL EXPERIENCE

Senior Software Engineer

TechStream Solutions

Jan 2021 – Present

- Lead the design and implementation of high-performance RESTful APIs and microservices using Go and Python, serving over 1M+ daily active users.
- Architected and optimized distributed backend systems, reducing latency by 35% through efficient database query tuning and caching strategies.
- Collaborate closely with product and design teams to translate business requirements into technical roadmaps and system architectures.
- Mentor 4+ junior engineers, conducting thorough code reviews and hosting weekly technical deep-dives to foster a culture of continuous learning.
- Orchestrated the migration of legacy services to Kubernetes, improving deployment frequency by 50% using CI/CD best practices.

Software Engineer

DataNexus Systems

June 2018 – Dec 2020

- Developed and maintained core platform features using Java and Spring Boot, focusing on reliability and scalability.
- Managed and optimized NoSQL (MongoDB) and Relational (PostgreSQL) databases to handle large-scale data ingestion.
- Built automated unit and integration testing suites that increased test coverage from 60% to 92%.
- Contributed to the development of internal data pipelines, enhancing data processing speeds for real-time analytics.

TECHNICAL SKILLS

Languages

Python, Go, Java, SQL, C++

Backend & Cloud

Microservices, RESTful APIs, AWS (EC2, S3, Lambda), GCP, Docker, Kubernetes

Databases

PostgreSQL, MySQL, MongoDB, Redis, Pinecone (Vector DB)

Specialized

NLP Pipelines, Embedding Models, CI/CD (Jenkins, GitHub Actions), Distributed Systems

EDUCATION

Bachelor of Science in Computer Science

2014 – 2018

University of California, Berkeley

OPEN SOURCE & PROJECTS

- **Core Contributor:** Participated in the development of an open-source distributed tracing library for Python.
- **Machine Learning Project:** Developed a custom NLP pipeline for sentiment analysis using Transformer-based embedding models.
